1921 – 2008

Contents

0	Introduction	7
0.1	Java Components	7
0.2	Applet and GUI Programming	8
0.3	Java 5.0	9
0.4	What Is OOP?	9
0.5	Generic Programming	11
0.6	Java Features	12
0.7	Object Oriented Design	14
0.8	Website and Organization of Material	14
1	Classes and Objects	15
1.1	Java Program Structure	15
1.2	A First Program	16
1.3	Defining Methods	17
1.4	Data Types and Variable Declarations	18
1.5	Data Abstraction and Encapsulation	21
1.6	Classes and Objects	21
1.7	String Basics	26
1.8	Arrays	28
1.9	Method Invocation and Argument Passing	30
1.10	Standard I/O	31
1.11	Command-line Arguments and <code>main</code>	31
1.12	Problem Solving with Objects	33
1.13	Solution via Objects	36
1.14	Object-oriented Thinking	38
1.15	Code Organization	39
1.16	Programming Tips	39
1.17	Summary	40
	Exercises	42
2	Java Features and Constructs	45
2.1	Formatted I/O	45
2.2	ASCII Character I/O	46

2.3	File I/O	47
2.4	Basic Error and Exception Handling	47
2.5	A Class of Fractions	51
2.6	Identifier Scoping	54
2.7	Instance and Class-wide Members	56
2.8	Symbolic Constants	58
2.9	Enum Constants	59
2.10	Using Arrays: Quicksort	61
2.11	More on Strings	63
2.12	String Pattern Matching	64
2.13	String Tokens	65
2.14	StringBuilder	65
2.15	Two-dimensional Arrays	66
2.16	A Matrix Class	67
2.17	Displaying a Monthly Calendar	69
2.18	Type Conversions	71
2.19	Implicit Type Conversion	71
2.20	Explicit Type Casts	72
2.21	Programming Tips	73
2.22	Summary	74
	Exercises	74
3	Object-based Programming	77
3.1	A Term Life Insurance Account	78
3.2	A Term Life Premium Calculator	79
3.3	Java Wrapper Classes	80
3.4	Operations on Characters	81
3.5	A URL Decoder	82
3.6	Autoboxing and Unboxing	83
3.7	A Circular Buffer	83
3.8	Pocket Calculator Simulation	87
3.9	Linked List	95
3.10	Method with Variable Number of Arguments	99
3.11	Method Overloading	100
3.12	Storage Allocation and Management	101
3.13	Summary	102
	Exercises	103
4	Inheritance and Class Extension	107
4.1	Advantages of Inheritance	107
4.2	Class Extension Basics	108
4.3	Class Scope Nesting	110
4.4	Extended Object Composition	111

4.5	Free Checking Account	112
4.6	Access Control Under Class Extension	114
4.7	Class Extension Principles	115
4.8	Subclass Constructors	116
4.9	Subclass <code>Finalize</code>	117
4.10	Type Relations Under Inheritance	118
4.11	Field Access Under Subclassing	119
4.12	Hiding of Fields and Static Methods	119
4.13	Method Access Under Subclassing	120
4.14	Method Overriding	120
4.15	Dynamic Invocation of Overriding Methods	121
4.16	Example: Numeric Wrapper Classes	122
4.17	Method Overloading in Subclasses	123
4.18	Calculator with <i>SQRT</i>	124
4.19	Summary	125
	Exercises	126
5	Generic Programming	129
5.1	The <code>Object</code> Class and Generic Codes	129
5.2	Generic Programs	130
5.3	Writing Generic Programs Using <code>Object</code>	131
5.4	Generic Linked List Using <code>Object</code>	132
5.5	Generic Stack	134
5.6	Type-Parameterized Generic Containers	135
5.7	Managing Text Lines	136
5.8	Generics	138
5.9	Writing Type-Parameterized Generic Programs	139
5.10	Type Parameterization Syntax	141
5.11	Type Parameterized Methods	142
5.12	Summary	143
	Exercises	145
6	Interfaces and Polymorphism	147
6.1	Programming with Plug-compatible Objects	148
6.2	Using Plug-compatible Components	150
6.3	Planning Uniform Public Interfaces	151
6.4	Defining Interfaces	152
6.5	Implementing Interfaces	154
6.6	Why Interfaces?	155
6.7	Extending Interfaces	155
6.8	Abstract Superclass	156
6.9	Abstract Sequence	157
6.10	A Sequence of Dates	161

6.11	Ordering Text Lines	163
6.12	Interfaces VS. Abstract Classes	165
6.13	Cloning Objects	166
6.14	Inheritance Planning	169
6.15	Summary	170
	Exercises	171
7	Packages and Core Classes	173
7.1	Packages	173
7.2	Java-supplied Packages	176
7.3	Accessing Java Documentation	177
7.4	Input and Output	177
7.5	File I/O	180
7.6	Buffered I/O	180
7.7	Print Writers	181
7.8	Term Life Account Files	181
7.9	File Updating	183
7.10	Other I/O Streams	185
7.11	Textual and Unicode Character I/O	186
7.12	Formatted I/O	188
7.13	Number and Date Formatting	188
7.14	Non-character I/O	192
7.15	Object I/O	193
7.16	Object Serialization Concepts	194
7.17	Error and Exception Handling	195
7.18	Matrix with Exceptions: An example	200
7.19	Character-based Standard I/O and Error Reporting	202
7.20	Mathematical Computations	203
7.21	Date and Calendar	203
7.22	System and Environment Properties	205
7.23	Summary	207
	Exercises	208
8	Applets and Event-Driven Programming	211
8.1	About Networking	211
8.2	The Web	212
8.3	Web Pages and HTML	215
8.4	Applets	216
8.5	A First Applet	218
8.6	Testing and Deploying Applets	220
8.7	Browser Control of Applets	221
8.8	GUI Programming Basics	224
8.9	Event Handling	225

8.10 Tic Tac Toe	231
8.11 Sound Effects	242
8.12 Inner Classes	244
8.13 Applet Parameters	247
8.14 Applet Security Restrictions	248
8.15 Summary	249
Exercises	250
9 GUI Programming	253
9.1 GUI Programming Overview	254
9.2 Widget Concepts	254
9.3 Swing Basics	255
9.4 Overview of Swing Widgets	257
9.5 Swing Widgets	258
9.6 Atomic Widgets	262
9.7 Text Input Widgets	266
9.8 Drawing Custom Graphics	269
9.9 Drawing Support	274
9.10 Raised Pie Chart	278
9.11 Layout Management	281
9.12 Using Dialogs	284
9.13 Using Menus	287
9.14 Event Handling Notes	292
9.15 Applet-application Dual-purpose Programs	292
9.16 Summary	294
Exercises	295
10 Generics and the Collections Framework	299
10.1 The Collections Framework	300
10.2 Lists	300
10.3 Generics Subtyping and Wildcard	305
10.4 Compiling Generics Code	305
10.5 Map	306
10.6 Iterators	310
10.7 Sets	312
10.8 Collections Framework Interface Hierarchies	313
10.9 Framework Iterators	315
10.10 Functors	316
10.11 Generic Algorithms for Containers	317
10.12 Thread-safe Containers	319
10.13 Read-Only Containers	320
10.14 Container Compatibility	321
10.15 Defining Custom Containers	321

10.16	Summary	322
	Exercises	323
11	Networking	325
11.1	Networking by URL	326
11.2	Creating and Manipulating URLs	327
11.3	Reading from a URL	327
11.4	Communicating with a URL	329
11.5	HTTP Basics	330
11.6	A URL Downloader	332
11.7	The POST Query	334
11.8	Query Body Encoding	335
11.9	A POST-Query Client	336
11.10	A Specific URL Client	339
11.11	Networking in Applets	340
11.12	Server-Side Programming	341
11.13	Network Communication with Sockets	342
11.14	Stream Socket Clients	343
11.15	Datagram Sockets	346
11.16	Creating Network Servers	346
11.17	Stream Socket Server Example	347
11.18	Remote Method Invocation	351
11.19	Summary	356
	Exercises	357
12	Threads and Concurrent Programming	359
12.1	What Is a Thread?	359
12.2	Threads in Java	361
12.3	Programming Threads	362
12.4	Launching Threads	362
12.5	Thread Control	363
12.6	Mutual Exclusion for Java Threads	365
12.7	Coordinating Threads	370
12.8	Consumer and Producer	370
12.9	I/O Between Two Threads	374
12.10	Thread Priorities	375
12.11	Terminating Thread Execution	376
12.12	Runnable Classes	376
12.13	Concurrency Utilities	377
12.14	Multithreaded GUI Applications	377
12.15	Timer with Images	385
12.16	Decoupled Image Loading and Drawing	388
12.17	Animation	390

12.18	AnimatorPanel	391
12.19	Animator2 Applet-Application	393
12.20	The Image Manager	395
12.21	Summary	397
	Exercises	397
13	Advanced Topics	399
13.1	Reflection	399
13.2	Dynamic Class Loading	406
13.3	The Java Run Time	409
13.4	Running Other Programs from Java	410
13.5	The Java Native Interface	411
13.6	JNI Example: Basic	411
13.7	JNI Example: Argument Passing	415
13.8	JNI Example: Strings	416
13.9	JNI Example: Arrays	418
13.10	Generating Java Documentation in HTML	419
13.11	Clipboards	423
13.12	Interapplet Communication	427
13.13	Java Security Manager	430
13.14	Signed Applets and Dynamic Trust Management	433
13.15	Summary	435
	Exercises	436
14	Object-Oriented Design	439
14.1	Decomposition Approaches	440
14.2	Object-Oriented Design Principles	441
14.3	Design Patterns	444
14.4	Unified Modeling Language (UML)	445
14.5	The CRC Method	446
14.6	Pocket Calculator Simulation	446
14.7	The MVC Design Pattern	456
14.8	Swing Widget Architecture and MVC	458
14.9	Summary	462
	Exercises	463
A	Java Tools	465
A.1	The SDK Distribution	465
A.2	Using the Java Compiler	467
A.3	Java IDEs	468
B	Java Keywords and Operators	469
B.1	Operator Precedence	469

C	Common Java Constructs	471
D	Major Differences Between Java and ANSI C/C++	477
E	Layout Managers and Swing Widgets	481
	E.1 Layout Managers	481
	E.2 Swing Widgets	487
F	Colors in JFC	489
	F.1 Color Specifications	489
G	Basic Java I/O Classes	491
H	Mathematical Computations	495
	H.1 Class <code>Math</code>	495
	H.2 Package <code>java.math</code>	496
I	The Java Debugger: <code>jdb</code>	497
	I.1 Starting and Exiting <code>jdb</code>	497
	I.2 How <code>jdb</code> Helps Debugging	498
	I.3 Debugging Steps	498
	I.4 Sample Debugging Session	499
	I.5 Commands	500
J	Basic Background	503
	J.1 Statements	503
	J.2 The <code>while</code> Statement	504
	J.3 A Complete <code>factorial</code> Program	505
	J.4 Simple Conditional Statements	506
	J.5 Operators and Expressions	512
	J.6 Iteration Control	516
	J.7 Multiple Choice	519
	Index	521
